Summary

Data scientist with 3+ years of experience building data-driven decision systems across operations and strategy. Currently pursuing MSc Business Analytics at UCL with focus on statistical modelling, time-series analysis, and optimisation. Experienced in developing end-to-end data pipelines, predictive models, and KPI dashboards that translate complex datasets into stakeholder-ready insights. Strong interest in causal inference, forecasting systems, and AI-enabled decision support.

Education

University College London

London, UK

MSc Business Analytics

09/2025 - Present

- Data Engineering, Python, R, Predictive Analytics
- Fintech, Business Strategies, Marketing Analytics

Experience

Potentia

London, UK

Operations Intern

09/2025 - Present

- Extracted & analysed multichannel campaign performance datasets using Python & Excel, identifying trends that drove a **60% increase in reach**.
- Wrote automated data collection scripts to track content delivery metrics across, eliminating manual tracking and achieving **100% reporting accuracy**.
- Queried audience & competitor datasets to surface growth patterns, producing data-backed reports that contributed to **expansion** in audience reach.
- Built an operational performance reporting model visualising KPIs across 4 delivery streams, reducing leadership reporting time by **25%**.

Bhavna Roadways

Mumbai, India

Operations Executive

08/2022 - 08/2025

- Built KPI dashboards in SQL and Excel to track throughput and cost metrics, improving leadership visibility and **decision accuracy by 30%**.
- Conducted time-series analysis of operational data to **identify bottlenecks** and optimise process flow, reducing turnaround time by 25%.
- Conducted cost-structure analysis and scenario modelling to support strategic planning decisions, contributing to 10–15% cost efficiency improvements.
- Standardised SOPs using data-backed performance metrics, aligning **cross-functional stakeholders** on measurable guardrails and KPIs.

Skills

Programming & Data Engineering: Python (Pandas NumPy Scikit-learn) • SQL • PostgreSQL • Git/GitHub • API Integration • Model Evaluation

Statistical & Analytical Skills: Statistical Inference • Hypothesis Testing • Time-series Analysis • Predictive modelling • Feature Engineering

Optimisation & Decision Systems: Constraint-based modelling • Scenario Analysis • Business rule modelling • Refutation testing

Visualisation: Power BI • Tableau • Dashboard design • stakeholder reporting • Microsoft PowerPoint

Projects

Causal Analytics Framework for Starbucks UK

https://github.com/vedantbhatiaa/Causal_Analytics_Framework_Starbucks

11/2025 - Present

- Built DoWhy causal inference pipeline on Starbucks UK reviews, estimating -0.30 star London penalty via PSM and backdoor identification ($p < 0.001$).
- Replaced OLS with Pearl's SCM, correcting confounding bias by 14% and validating causal claims through 1,000-permutation placebo refutation tests.
- Conducted mediation analysis showing ~40% of the London rating gap was driven by service sentiment and ~25% by price perception factors.
- Delivered a board-ready 3-phase investment roadmap projecting +0.15 star rating recovery, translating causal estimates into sequenced business strategy.

ESG Analysis Platform

<https://github.com/vedantbhatiaa/esg-platform>

12/2025 - Present

- Identified lack of ESG data access by engineering an end-to-end ingestion pipeline from the EPA EnviroFacts API, improving data consistency by **60%**.
- Developed a **20+ indicator** materiality framework to standardise sustainability scoring, enabling quantified ESG risk assessment across GRI, SASB, & TCFD.
- Applied statistical modelling to generate company-level ESG scores, enabling cross-company benchmarking and peer comparison across **frameworks**.
- Built a real-time interactive dashboard with dynamic framework-switching and rating bands, reducing manual ESG assessment effort by an estimated **40%**.

Co-Curricular Activities

Founder at The Learning Curve

2024 - Present

Founded a career mentorship initiative connecting students with professionals across consulting, finance, and technology for personalised career guidance.

Volunteer at HariPrabodham Swaminarayan Sanstha

2022 - Present

Volunteered with a global Hindu humanitarian & spiritual organisation delivering community welfare, youth development, and humanitarian services
